# **Stosowane kolory**

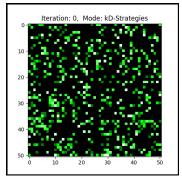

------Iter=0------

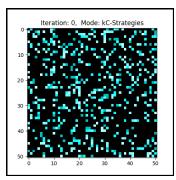

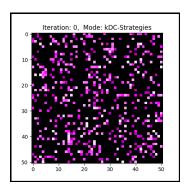

< tu obrazek jest OK, ale kolor niebieski powinien być zamieniony na:

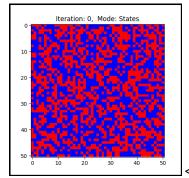

bialy-state "0", czerwony-state "1 jest OK

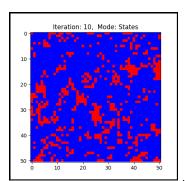

|< tu powinien być obrazek - "Actions" (a nie "States") z kolorami:</pre>

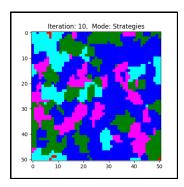

niebieski-Dstar, czerwony - Cstar

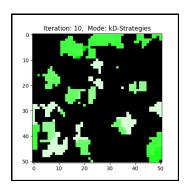

-----iter 10------iter 10------

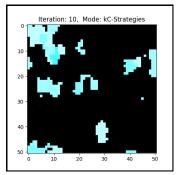

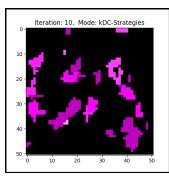

J,< tu obrazek jest OK, ale kolor niebieski powinien być zamieniony na:

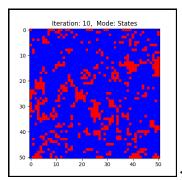

bialy-state "0", czerwony-state "1 jest OK

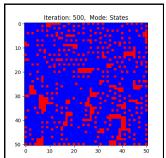

| < tu powinien być obrazek - "Actions" (a nie "States") z kolorami:</p>

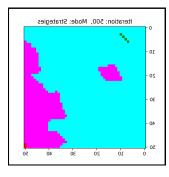

niebieski-Dstar, czerwony - Cstar

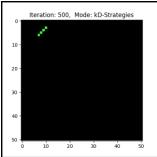

-----iter 500------iter 500------

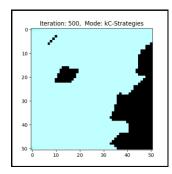

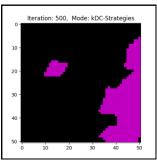

- tu obrazek jest OK, ale kolor niebieski powinien być zamieniony na:

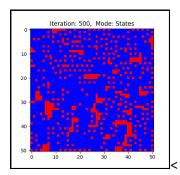

bialy-state "0", czerwony-state "1 jest OK

l< tu powinien obrazek - "Actions" (a nie "States") z kolorami: niebieski-

Dstar, czerwony - Cstar

## Stosowane kolory (podsumowanie)

W

#### CA\_states[,]

Stan komórki: "0": white

Stan komórki: "1": red

W

### CA\_strat[,], CA-kD\_strat[], CA\_kC\_strat[,], CA\_kDC\_strat[,]

Strategia k-D: green (odcienie zieleni: im większe k tym ciemniejsza zieleń)

Strategia k-C: cyan (odcienie cyanu: im większe k tym ciemniejszy błękit)

Strategia k-DC: pink (odcienie pink: im większe k tym ciemniejszy róż)

W

#### CA\_actions[,]

Akcja komórki gracza: "D" – blue

Akcja komórki gracza: "C" – red
